**London School of Economics**

**WT 2025**

# Interview an LLM

- ▶ **Task:** Interview an LLM about the Brexit referendum.
- ▶ **Goal:** Understand how the LLM generates responses and what biases it may have.
- ▶ **Instructions:**
  - ▶ Use the LLM to generate a persona of a UK voter in 2024
  - ▶ Choose education, age, gender.
  - ▶ Example prompt: I want you to act as a [X year old] [gender] voter with an [X education] from the UK in 2016 right before the Brexit Referendum and answer the following question: [insert question].
    - ▶ How did you vote on Brexit? Why?
    - ▶ How do you think the UK government should handle Brexit negotiations?
    - ▶ How will the UK economy be affected by Brexit?
    - ▶ What do you think about the role of the EU in the UK's future?
  - ▶ Record how the LLM responds to the first question on [Google Sheets](#)

# Discussion Questions

- ▶ **Discussion Questions:**
  - ▶ How realistic or stereotyped did the responses feel?

# Discussion Questions

## ▶ Discussion Questions:

- ▶ How realistic or stereotyped did the responses feel?
- ▶ What biases did you notice in the LLM's responses?

# Discussion Questions

## ► Discussion Questions:

- How realistic or stereotyped did the responses feel?
- What biases did you notice in the LLM's responses?
- How could this tool be used or misused in real research?

## ► Discussion Questions:

- How realistic or stereotyped did the responses feel?
- What biases did you notice in the LLM's responses?
- How could this tool be used or misused in real research?
- Would you trust simulated data like this in your own political research? If so, when and how?
